UCBC
RETAINING WALL CONTRACTING

CAPABILITY STATEMENT

Specialist retaining wall contractors. Design, supply, construction and certification for civil, commercial, Defence and residential projects across Sydney, regional NSW and the ACT.

ENTITY	ABN	ACN	ISSUED
United Crib Blocks Construction Pty Ltd	64 060 212 553	060 212 553	September 2026

THE COMPANY

Retaining walls since 1977

Nick Bouhoutsos started United Crib Blocks Construction in 1977, supplying and building crib block walls for the civil and commercial trade. George Bouhoutsos leads the company today as Managing Director. The work is the same: retaining walls designed, built and certified for head contractors, developers and asset owners.

HEAD OFFICE	105A Coogee Bay Road, Coogee NSW 2034	OPERATING AREA	Sydney, regional NSW and the ACT
PHONE	(02) 9344 9168	EMAIL	ucbc@unitedcrib.com.au

WHAT WE DO

Design
Wall selection, engineering coordination and drawings for the site, the loads and the ground.

Supply
Precast crib, Keystone, Allan Block, Keymass, sleeper, gabion and precast components through established supplier relationships.

Construction
Built by our own crews with our own excavators and block-lifting grabs, on civil and commercial programmes.

Certification
Hold-point inspections and engineering certification coordinated from the first drawing to handover.

SECTORS

Civil and infrastructure
Retaining walls for rail corridors, road works, freight lines and civil earthworks across NSW and the ACT.

Commercial and industrial
Retaining walls for warehouses, distribution centres, industrial estates, schools and health sites across Sydney, built by UCBC for commercial head contractors.

Defence estate
UCBC has built retaining walls on Defence establishments including HMAS Harman in Canberra and Blamey Barracks at Kapooka, for John Holland and Richard Crookes.

Residential estates and homes
Retaining walls for residential subdivisions, social housing and private homes across Sydney, from staged estate walls for Stockland to a single boundary wall.

Regions covered: Western Sydney, South-west Sydney, Northern Beaches, Northern Sydney and the north shore, Canberra and the ACT, Regional NSW.

WALL SYSTEMS

Ten systems, chosen for the site

The ground decides first, then the height, then the finish. We recommend the wall the site calls for, not the one we happen to sell, then design it, supply it, build it and certify it.

Crib block retaining walls
Cut and fill batters on civil and subdivision work. Rail and road corridors.

Keystone retaining walls
Residential subdivisions and estates. Commercial and industrial lots.

Allan Block retaining walls
Residential and landscape walls. Commercial car parks and site boundaries.

Keymass retaining walls
Industrial hardstands and yards. Civil cut batters.

Concrete sleeper retaining walls
Property boundaries and side setbacks. Driveways and car parks.

Gabion walls and scour protection
Creek and channel banks. Flood and scour protection.

RSS precast concrete retaining walls
Civil and infrastructure retaining. Rail and road corridors.

Segmental block retaining walls
Subdivision and estate walls. Commercial site boundaries.

Reinforced core-filled block walls
Vertical walls against boundaries. Walls supporting driveways, slabs and buildings.

Stacked rock and boulder walls
Estate and subdivision batters. Landscape and feature walls.

Plant. The same excavators, grabs and operators that place our precast walls are available for hire. Wet hire with an operator is available for retaining wall and civil work; the fleet list is supplied with the prequalification pack.

Prequalification pack. Insurance certificates (public liability and workers compensation), the plant list, safety documentation, certifications and referees are supplied on request to head contractors and developers. (02) 9344 9168 · ucbc@unitedcrib.com.au

TRACK RECORD

Documented projects

Each project below has its own page on our website with the system, the location and the scale. Head contractor referees are supplied with the prequalification pack.

PROJECT	BUILDER OR CLIENT	LOCATION	WALL AREA	YEAR	SYSTEM
Kemps Creek industrial estate	Industrial estate developer, Western Sydney	Kemps Creek NSW		2025	Keymass
HMAS Harman, Canberra	John Holland	Canberra ACT	1,600 m²	2013	Crib block
Blamey Barracks, Kapooka	Richard Crookes Constructions	Kapooka, Wagga Wagga NSW	1,600 m²	2013	Crib block, Keystone
Southern Sydney Freight Line, Sefton	Arenco (Southern Sydney Freight Line alliance)	Sefton NSW	4,000 m²	2012	Keystone, Crib block
CSR facility, Erskine Park	TRN Group	Erskine Park NSW	4,800 m²	2012	Keymass, Crib block
FDC facility, Warriewood	FDC Construction & Fitout	Warriewood NSW	3,000 m²	2012	Keystone
Ingram Micro, Eastern Creek	Hansen Yuncken	Eastern Creek NSW	2,500 m²	2011	Keystone, Keymass
Royal Rehabilitation Centre, Ryde	ADCO Constructions	Ryde NSW	1,200 m²	2013	Keystone
Stockland Glenmore Ridge	Burton Contractors	Glenmore Park NSW	2,200 m²		Keystone
Stockland Lakewood	Daracon	Lakewood estate	Walls from 1 m to 4 m high, staged		Keystone
Australand storage facility for Kmart and Cassons	Australand		1,800 m² (Cassons) plus over 2,000 m² (Kmart)	2011	Keystone
Logistics facility, Erskine Park	Logistics operator	Erskine Park NSW	1,850 m²		Crib block
St Luke's Grammar School, Dee Why	St Luke's Grammar School	Dee Why NSW	Approximately 200 m², 3 m high		Keystone
Burton Contractors, Prestons	Burton Contractors	Prestons NSW	Over 400 m², average 1.5 m high		Keystone
Watpac social housing, south-west Sydney	Watpac Constructions	Macquarie Fields, Narwee and Blackett NSW	Low walls, average 600 mm		Keystone

Referees for these projects are supplied with the prequalification pack. (02) 9344 9168 · ucbc@unitedcrib.com.au
